Sr. Software Engineer

7008857364 | subhasish.mishra17@gmail.com | github.com/smishra11 | Bengaluru, India

SUMMARY

Frontend Engineer with 4+ years of experience building scalable web applications using React.js, Next.js, TypeScript, and modern UI frameworks. Specialized in developing high-performance, responsive user interfaces, workflow automation tools, and data-driven dashboards. Proven track record of owning end-to-end frontend development and delivering business-critical features.

SKILLS

HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, React Router, Redux, Zustand, Tailwind CSS, Material UI, SASS/SCSS, Bootstrap, ShadCN UI, Rest API, GraphQL, Figma, Git, Unix/Linux, Jira, Agile, Unit testing, React Testing Library, Gen AI

EXPERIENCE

Sr. Software Engineer

Recro

03/2024 - 01/2026 | Bengaluru, India

- Developed reusable React and Next.js component libraries, cutting down repeated development effort across multiple features and modules.
- Reduced page load times by 30% through lazy loading, code splitting, image optimization, and SSR best practices.
- Led SEO and accessibility improvements across key pages, including semantic HTML, meta/structured data, and WCAG-aligned fixes, strengthening search visibility and overall user experience.
- Worked closely with product managers, designers, and backend engineers to translate business requirements into shippable frontend features, owning implementation from design handoff to production.

Frontend Developer

TrustCheckr (A Truecaller Company)

03/2021 - 09/2023 | Bengaluru, India

- Owned core frontend development of an identity intelligence platform, building scalable and maintainable component architectures using React.js and Material UI.
- Built secure authentication and onboarding flows, along with subscription and payment management features to support premium user experience.
- Engineered interactive dashboards surfacing trust scores, personal insights, and digital footprint analysis across phone numbers, email addresses, and IP addresses.
- Designed and built a drag-and-drop bulk processing system that let users upload Excel files and verify 1,000+ phone numbers, emails, or IP addresses in a single batch, handling file parsing, validation, and progress tracking on the frontend.

PROJECTS

Jumio

07/2025 - 01/2026 | Bengaluru

- Built key features for an identity verification platform, including a drag-and-drop workflow builder, visual rule configuration, undo/redo functionality, and automated canvas styling.
- Developed a visual workflow builder for an identity verification platform, enabling users to configure and deploy verification processes through a drag-and-drop interface.
- Implemented rule orchestration, node-based workflow connections, and automated canvas styling for improved usability and productivity.

TON Capital

09/2024 - 01/2025 | Bengaluru

- Led frontend development for TON Capital, a Web3 platform for node management, staking, and airdrops on the TON ecosystem, building responsive interfaces for wallet interaction, rewards, and referral features.
- Implemented Web3 authentication using MetaMask, integrated blockchain wallet connectivity, and developed secure login, staking, reward claiming, and referral workflows to deliver a seamless user experience.

Trustcheckr

03/2021 - 09/2023 | Bengaluru

- Owned end-to-end frontend development of an identity intelligence platform delivering trust scores, personal insights, and digital footprint analysis, while enabling large-scale bulk processing of phone numbers, email addresses, and IP addresses.
